## SUMMER TERM 2 2026

WELCOME BACK!

I can't even believe I am writing this, but it's our last half-term together and your last half term of primary school! This year has gone by so quickly and I am so so proud of how incredibly hard you have worked this year. This last half term is full of transition activities to support your move to secondary school and lots of fun activities for us to do together.

Mrs McCay is now on maternity leave with baby George, who is now home and feeling much better after a couple of weeks in hospital. She is still helping us with end of year preparations, just from a distance!

Thank you all,  
Mr McCay

We are carrying on reading the *Nowhere Emporium* this half term.

Please bring your PE kits every day as we are going to get outside as much as possible!

### GLOBAL CHALLENGES: Trade

Our topic this term continues from our previous one is summer term 1, but is focused on trade across the world.

We will explore natural resources and how the world trades these to support the economy. We will look at sustainability and how some trade around the world is not fair and offers many challenges.

WHAT ARE NATURAL RESOURCES?
